🌐 <https://github.com/jmlll-afk>

An enthusiastic and self-motivated Computer Science student with 3 years of coding experience in the academe. Eager to join your company to further enhance my skills in developing websites under your internship program.

## Projects

### Mobile Point of Sale System

- Self-studied how to make mobile applications using Xamarin Forms using different video tutorials, forums, and documentation.
- Developed a mobile point of sale system for a local fruit shake stand here in our town, that have features of order processing, inventory management, and sales management, for compliance on our final project for Software Engineering 2.

### Library Management System

- Worked together with my classmates or groupmates to do a simple library management system, for compliance on our final project for Software Engineering 1.
- Used basic programming language and markup languages in developing this system like HTML, CSS, PHP, and JavaScript.

### Game Development

- Work together with my friends as we join UPLB's Game Jam, partaking in different workshops and creating a functioning game at the end of the event.
- We used Godot Engine as we develop the game and finished and submitted it on the deadline

### Game Development (LUCID)

- Worked together with my classmates or groupmates to do a simple game, for compliance on our final project for Game Development.
- We used Godot Engine as we develop the game and finished and submitted it on the deadline

## Education

### General Mariano Alvarez Technical High School

2019-2021

- Science Technology, Engineering, Mathematics Strand

### Cavite State University - Silang Campus

2021-Present

- Bachelor of Science, Computer Science

## Skills

- Coding
  - HTML
  - CSS
  - Javascript
  - C++
  - C#
  - Java
- Communication Skill
- Problem-solving
- Time Management
- Eye for Detail
